

CONTOUR

Contour is a multi – disciplined firm providing innovative solutions for our clients. We offer specialised engineering, environmental and project management expertise in preliminary planning, detailed design and construction phase services throughout Australia, Asia and the South Pacific Islands.

PROFESSIONAL EXPERTISE

From group title boutique developments to major industrial estates, expansive medium density retirement villages, high profile master-planned residential communities, and accommodation camps. Our directors and senior staff have vast experience with the various phases of property development, and understand how best to streamline the delivery for each project.

We understand that infrastructure and development projects require diverse skills including feasibility studies, advisory services, cost planning, budget estimates, design engineering, environmental assessment, hydrology studies, flood studies, surveying, planning and project management for complete delivery of our clients projects.

VALUE-ADDING FROM EXPERIENCE

At Contour we provide sustainable solutions to our clients development needs.

We specialise in initial project feasibility assessment, concept master planning and detailed development layouts that consider buyer appeal, public amenity, local authority conditions, engineering practicability and ultimate profitability for our clients.

RECENT REPRESENTATIVE PROJECTS

LAND DEVELOPMENT

'THE ATRIUM'

BUDERIM, SUNSHINE COAST

\$100M integrated community comprising townhouses and apartments. Contour were civil, structural and environmental engineers for the 300 unit medium / high density 'Atrium' project. Contour's services included concept planning feasibilities, flood modelling, bulk earthworks, detailed civil, structural and environmental engineering design and documentation, construction supervision and contract administration.

OASIS RETIREMENT RESORT

PETRIE CREEK

150 dwelling retirement village including public facilities buildings, community pool, and associated infrastructure. Services included initial concept planning through to detailed engineering designs and construction phase services. The project included external roadworks, trunk services, a sewage pump station, detention basin and environmentally sensitive corridors and waterways.

ACCOMMODATION CAMP & RESIDENTIAL SUBDIVISION MILES

Lot reconfiguration and MCU application for a 620 person accommodation facility and 366 lot residential subdivision in Miles. Contour has provided project concept designs, feasibility analysis, cost estimations, and engineering design and reporting services.

WHITE SANDS

VANUATU

A master planned resort with Pacific Ocean frontage comprising 350+ rural-residential style allotments, an 18 hole Robert Trent Jones II golf course, plus hotel and resort infrastructure. Contour provided engineering design and supervision for stage 1 works which included 95 lots, wetlands and lakes and an on-site reservoir.

CALLIOPE CENTRAL SHOPPING PRECINCT

CALLIOPE IGA AND SPECIALITY SHOPS

2000m² GFA + 150 car parks. Contour's services included civil detailed engineering design and documentation, plus construction supervision for services, building pads, roads, car parks and detention basin, including the design upgrade for the Dawson Highway intersection as a Main Roads requirement for the project.

PEREGIAN SPRINGS

PEREGIAN SPRINGS, SUNSHINE COAST

A 2000+ lot master planned residential community on the Sunshine Coast. Services included project concept design, feasibility analysis, cost estimation, engineering design, construction supervision and contract administration. The project included wetlands, lakes, and a >500,000m³ bulk earthworks operation in an environmentally sensitive region.
