

CONTOUR

Contour is a multi – disciplined firm providing innovative solutions for our clients. We offer specialised engineering, environmental and project management expertise in preliminary planning, detailed design and construction phase services throughout Australia, Asia and the South Pacific Islands.

CONTOUR ARE A PRE-EMINENT AUTHORITY IN THE PLANNING, DESIGN AND INSTALLATION OF RACING INFRASTRUCTURE NATIONWIDE.

CONTOUR ARE SPECIALISTS

Contour have a proven track record of delivering innovative high quality services to numerous high profile provincial and metropolitan racing and training facilities throughout Australia. With 5+ years of specialised services to all facets of the equine industry, Contour is broadly recognised as one of the country's leading players in racecourse redevelopment. Our intensive involvement in racing has allowed Contour the luxury of compiling a comprehensive library of knowledge, which enables us to significantly value-add to any new racing venture.

CONTOUR ARE A 'ONE-STOP-SHOP'

We are able to offer a 'whole-of-project' service with specialised expertise in the following equine related fields:

- Harness track design
- Grass, sand and synthetic thoroughbred track design
- Bulk earthworks
- Vertical and longitudinal stormwater drainage
- Power, telecommunications, sewer and water supply infrastructure
- Track lighting (training and racing)
- Cross-track multi-purpose tunnels
- Projected planning, design and construction timelines
- Car parking and general road works
- Stormwater management
- Flooding mitigation
- Property development opportunities
- Traffic management for pedestrians, horses (race day and training), track maintenance and stewards
- Track geometry and race start positions
- Racing and training requirements
- Track crossing location(s)
- Public amenity, access and mobility
- Traffic and transport
- Irrigation and water harvesting
- Equine swimming pools
- Enhanced broadcasting and public viewing functionality
- Tie-up stalls, stables and swab facilities
- Integrated vehicle roadways
- Positioning of steward / camera towers
- Mounting yard and winners stalls configuration
- Grandstand orientation and design
- Marquee areas

EQUINE RACING

RECENT REPRESENTATIVE PROJECTS

EQUINE RACING

CORBOULD PARK RACECOURSE & FACILITIES CALOUNDRA, QLD

Contour were Engineers and Project Managers for \$60M of new or modified infrastructure including 256 state-of-the-art stables, track lighting (1400+ Lux), miscellaneous new buildings, car parks, pathways, roads, drainage and a new synthetic thoroughbred race track. Our services also included master planning future land uses and significant improvements to the existing club facilities and infrastructure.

ALBION PARK HARNESS RACETRACK BRISBANE, QLD

Contour were the civil engineers for redevelopment works to the eastern section of the existing standard bred race track. The project involved detailed design and documentation of major reconfiguration to the 'away' turn, including increased camber and super-elevation transitions. Our services included contract administration and supervision.

THOROUGHBRED TURF & SAND RACECOURSES VARIOUS VENUES IN QLD

Concept planning, through to detailed engineering design and construction phase services for new turf and/or sand tracks at Rockhampton, Beaudesert and Mackay Turf Clubs. The designs incorporated tunnels, drainage, irrigation, towers, new buildings, services, bitumen ambulance tracks and various associated infrastructure.

SPORTS ARENA LIGHTING VARIOUS VENUES AUSTRALIA WIDE

Contour were responsible for project managing the design and installation of track lighting to Clifford Park (QLD), Corbould Park (QLD) and Tote Racing Centre (TAS). The two latter venues were the largest and second largest sports arena installations in Australia with 956 and 800 luminaries respectively.

SYNTHETIC RACECOURSES CALOUNDRA & TOOWOOMBA, QLD

Concept planning and feasibility analysis of various synthetic materials at Caloundra and Toowoomba; followed by detailed engineering design and construction supervision of the synthetic race tracks. The projects also included other infrastructure works including track lighting, new car parking, lake extensions and other ancillary works.

INFRASTRUCTURE PLANNING RACING QUEENSLAND

Provision of detailed reports outlining concept designs and associated costs estimates for Racing Queensland Limited's proposed \$230M Industry Asset Infrastructure improvement scheme. The works encompassed 12 separate venues across Queensland, including detailed proposals for both equine and greyhound racing infrastructure. Contour's services also included attendance at public consultation sessions and assistance with preparation of individual Business Cases for Government.

The above list provides a representative token of Contour's project portfolio. A more detailed list is available upon request.
